

FUTURE ENERGY JOBS ACT

2017 COMED BILL CHANGES FOR RESIDENTIAL CUSTOMERS

This year, customers like you in Northern Illinois will see three line item changes on your ComEd bill because of a new law called the Future Energy Jobs Act (FEJA).

These changes under FEJA will help pivot Illinois to the new clean energy economy, creating significant consumer and environmental benefits, creating thousands of clean energy jobs, and providing job training for the future workforce.

The sample bill below shows the three line item changes you can expect to see over the course of 2017.

Franchise Cost		\$3.12
State Tax		\$1.94
Municipal Tax		\$3.70

Service Period Total

\$89.60

EXPLANATION OF THESE REQUIRED LINE ITEMS

Renewable Portfolio Standard

An existing charge - which has been embedded in your supply charge is now a separate line item - that helps support the development of residential and commercial renewable energy from wind and solar in Illinois.

Zero Emission Standard

This new line item supports zero-carbon energy supplied to Illinois.

Energy Efficiency Programs

Beginning in May an existing line item with a \$2 charge has been set to \$0 and temporarily removed from your bill.

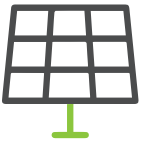

NOTE: These are **representative** numbers for an average ComEd-supplied residential customer. Actual numbers will vary nominally.

FUTURE ENERGY JOBS ACT

2017 COMED BILL CHANGES FOR RESIDENTIAL CUSTOMERS

Renewable Portfolio Standard:

Customers will see a new line item for renewable energy on their bills beginning this summer. About \$1 per month for ComEd-supplied residential customers, this is not a new charge but rather a shift in how this existing charge shows on bills. While it used to be inside customers' supply charge, it now shows as a separate line item. Resulting funds will support the growth of renewables in Illinois, setting the stage to grow enough solar and wind energy to power one million homes.

Zero Emission Standard:

Pending ICC approval, customers will begin to see a new charge on their bill - approximately \$1 per month for the average residential customer - starting in June 2017 for the Zero Emission Standard, which supports zero-carbon energy supplied to Illinois.

Energy Efficiency:

As we transition to new, expanded FEJA energy efficiency programs, customers will see a few different changes to this line item on their bill over the course of the year. Reduced energy efficiency costs will result in overall savings for customers over the course of 2017, with the exact amount of savings dependent on the conclusion of various regulatory proceedings.

- ▶ Beginning in May, customers will see the energy efficiency charge on their bills zero out - a change from about \$2/month for the average residential customer today.
- ▶ These savings are expected to continue through the end of the year, subject to ICC proceedings.
- ▶ As new, expanded FEJA energy efficiency programs begin in January 2018, the associated energy efficiency line item on customers' bills will change again - likely to an amount significantly less than the prior \$2/month average.
